

## **Bug Report — Auto-generated Employee Code Conflict**

**ID:** BUG-001

**Title:** Auto-generated employee code returns “already exists” error on save.

**Severity:** Medium

**Priority:** High

**Module:** Employee Management

**Environment:** QA Environment / Chrome / Windows 10

### **Description**

When creating a new employee profile, the system auto-generates the employee code.

However, an error message appears indicating the code already exists, preventing the user from saving the profile.

The issue is intermittent — it occurred during the first attempt, but the second attempt passed successfully.

### **Steps to Reproduce**

1. Go to **Employees → Create New Employee**
2. Fill all mandatory fields
3. Observe auto-generated employee code
4. Click **Save**

### **Expected Result**

The employee profile should be saved successfully with a unique auto-generated code.

### **Actual Result**

An error message appears saying the code already exists, blocking the save action.

### **Frequency**

Intermittent (reproduced 1 out of 2 attempts)

## Evidence

Add Employee

Employee Full Name\*

Sebastian	Jose	Mendoza
-----------	------	---------

Employee Id

0398

Employee Id already exists

Accepts jpg, png, gif up to 1MB. Recommended dimensions: 200px X 200px

## Status
